discovered. But it is the belief your Committee that hitherto a large majority of those persons responsible for the education, guidance and nurture of youth have followed an unfortunate course remarding the great sacred truths of life. This course has been one of silence and mysticism us a rule. This attitude on the part of purents and teachers of youth has the psychological effect of slimutating surlosity, with the almost universal resuit that children acquire distorted viewpoints and morbid misconceptions of great truths that rightly understood from the first, would engender feel ous of reverence for life and respecor all life processes. There seems herefore, but one rational course for arnest minded Christians to follow Plut course is to answer the natura mestions of their children freely frankly, fully, sincerely and sympathe

# Modern Dress Too Extreme.

Speaking of factors in the increasof the gocial evil "which are now assuming alarming proportions," the rerested at moon today and At. port says:

"One of these appears in the volctendency of modern faction. On Standards, we remember, expressly forbid all immolest amarel.' Today by tumorrow afternoon and many of our women are going to such extremes of dress us to shock even the east pradish, and open American comunitood to the charge of a comlete forfeiture of modesty. The unfortunate side of it all is, that the comen of the Church, whose most emplicates adornment is supposed te meekness, are quite as guilty of this offense as are women who male no religious professions. Until ou brieflan women can be made to that mischief is being done by such on, there can be little hope of stem ming this evil tide. We call the won on of our Presbyterian Church to cactical separation of themselves from these tendencies of our times, and exbort them to be at this point examples to their sisters, lending their sice and influence alike, against all Attennes of dress, and seeking to lead oriety in a more worthy and whole ome direction.

# Unchaste Amusements.

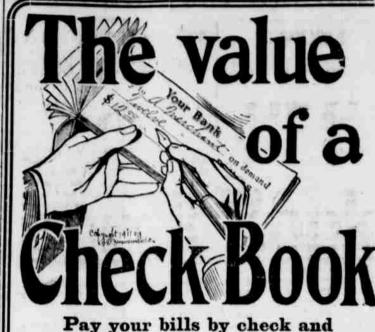

"Another contributory factor is the icreasing craze for excitable and un baste amusements. The dance, never erhaps what could be wished has beome the subject of indescribably vulor joke, and is calling out the contempation of many holding high placen of ecclesiastical authority. The noving-picture shows, although under what is claimed to be strict censorship, are calculated to inflame the thoughts and emotions of the young The theatre, with its outrageously flippant handling of sex problems and sitcations, as well as the notorious disregard of so many of its leaders fo high standards of murital and even ordinary moral relations, is laying a net hat must seduce and capture a con-

siderable part of our rising generation Literature Also Blamed. The literature of the day present another very serious factor in this great problem. Perhaps we are not mistaken when we speak of it as one of the most alarming symtoms of general condition that seems had indeed. Nearly every work of fiction that is printed today has woven some where in its plot the intricacies of sex question. The book reviews ar a long series of descriptions of such stories. One would imagine there was no other problem in people's minds today. And the most grave feature of it seems to be that this is what they ap-

"It may be that the flood of unclean Percy Penberthy, England, Laurium, literature, while much to be deploced ould not have been altogether unexpected, and is partly an evidence of an awakened conscience. If this element of hopefulness is discoverable, and is real, we will rejoice in it."
